Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 20, 2003 has been entered.

In view of the new claims and Exhibits 1 and 2 the earlier rejections under 35 USC 112, paragraphs one and two and 35 USC 103(A) are withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith in view of WO 96/31213.

Smith (page 33, columns 1 and 2) discloses that South American camelids (SACs) are susceptible to ulcers caused by stress. Smith further discloses a method of using omeprazole to prevent gastric ulcers in SACs. The claims differ over Smith in reciting prevention of gastric ulcers caused by stress in a horse. Dependent claims recite dosages and specific formulation.

Art Unit: 1614

However, since horses are also herbivores it would be obvious to one of ordinary skill in the art to use omeprazole in a method for preventing gastric ulcers caused by stress in them. One would have the expectation of success, since Smith discloses that omeprazole can be used to prevent gastric ulcers caused by stress in other herbivores.

Furthermore, WO 96/31213 discloses the dosage of claim 39 and the oral formulations of claims 43 and 44. Additionally, once a method of use is known it is within the skill of the artisan to determine optimum dosages and formulations.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Cook whose telephone number is (571) 272-0571. The examiner can normally be reached on Monday through Thursday.
